

# alcatrass

secure system management v4

## Price and Service Overview

### Price and Service Overview alcatrass Modules

**alcatrass** is a platform to monitor, control, and secure complex, heterogeneous systems and networks.

The three alcatrass components; server, agent, and routing module, allow for the easy implementation of all **alcatrass** functions:

- |                  |                               |
|------------------|-------------------------------|
| 1. Server        | - ITSC - IT System Center     |
| 2. Agent         | - Log to IT System Center     |
| 3. Routing Modul | - Central Messaging Interface |

#### 1. Server Component ITSC

One server instance 8.990.- € (incl. 3 Standard monitoring agents)

Two redundant instances\* 11390.- € (incl. 5 Standard monitoring agents)

\* The implementation of redundant ITSC instances is recommended for monitoring mission critical systems and applications, and meets increased security requirements.

#### 2. Monitoring Agents

##### Standard Agents:

The price per standard agent is 200.- €. The purchase of more of the same monitoring agents reduces the price per agent bought by 25.- € to a minimum price of 50.- € per agent.

Example calculation: Price for standard agents

Quantity	0-20	20-50	50-100	100-200	from 200
Price €	90.-	70.-	55.-	45.-	40.-

##### Special, highly integrated agents:

Price based on complexity. The purchase of more of the monitoring agents reduces the price per additional agent to 20% based on the original determined cost.

Example calculation: Price for special agents.

Quantity	1.	2.	more
Price €	400.-	160.-	160.-

##### Agent installation:

The price for agent connectivity with the ITSC, including installation and configuration, is 300.- € per agent.

#### 3. Routing Modul - CMI

- The is no licensing required for the routing Module.

#### □ 4. Price advantages for special packages

##### Startup

The startup package is designed for the monitoring of small networks, or to become familiar with the product on a small scope.

The startup package includes one server instance and is limited to a maximum of 5 monitoring agents. The server instance cannot be set up redundantly.

Server instance 50% price advantage: 4,495.- € and three free standard agents

#### □ 5. Upgrade of all components

Component upgrades are only needed for major releases. Servicepacks and fixes are always free of charge.

Version upgrades entail a one time 30% fee of the original price, or 2% of the original price per month.

For more information about our release services, contact your account manager.

#### ■ SKYTEC AG Services

Services from SKYTEC AG include IT Security planing, programming, system integration and administration of **alcatrass** .

We also offer training for **alcatrass** administrators and other users.

#### □ 6. Consulting Service

IT Security Planning:	€ 1,125.- / day
Programming:	€ 950.- / day
System integration and administration:	€ 750.- / day

#### □ 7. Training

Administration Training

3 persons per day (8 Hrs):	€ 1,250.-
each additional trainee per day:	€ 250.-
